

In light of financial implications, Patient Satisfaction has become an important element in product and procedure selection. Every clinic is concerned about adding cost to any procedure. When utilized, DermaHug actually reduces costs while improving outcomes and patient satisfaction.

When DermHug is utilized with the wound dressing, it has the potential reducing pain. Pain reduction results in lower opioid/pain medication administration. which results in better patient outcomes for optimal reimbursement to your hospital and clinics.

Contact Ultra Wound Care, LLC. to trial DermaHug in your facility.
